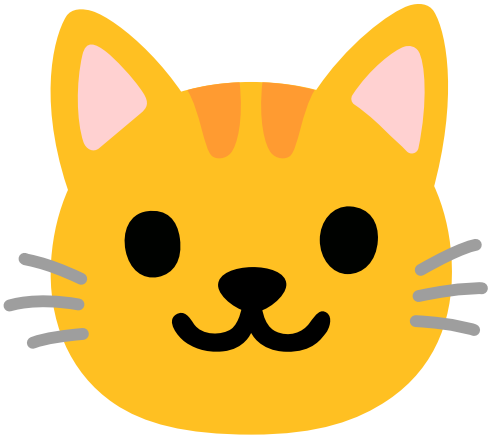
Tails-Tales

An AI assist Diary Writing Application



Shu Wang

Project summary

Tails-Tales is an AI-assisted diary writing app for pet owners. Users can write diary entries in their pet's voice, save them to a database, and use AI to suggest a title or make the writing sound more cat-like.

The MVP includes a home page, diary writing page, and diary detail page.

Core features / MVP vs Optional

MVP

- view all diary entries
- create and save a diary entry
- edit and delete an entry
- view diary detail page
- AI suggest title
- AI enhance cat voice

Optional

- Clerk login
- pet profile
- cover image generation
- analytics dashboard

API routes

Collection-level routes:

- GET /api/pets/:petId/entries
- POST /api/pets/:petId/entries

Single-entry routes:

- GET /api/entries/:id
- PUT /api/entries/:id
- DELETE /api/entries/:id

AI routes

- POST /api/ai/title
- POST /api/ai/cat-tone

Component/Page Structure

pages:
